

Diego Alexander Alemán Castro

Professional Profile:

I am a college student passionate about cybersecurity and computer networks, with a strong focus on offensive security. My specialty is controlled and ethical penetration testing.

Objective

I aspire to join a Red Team, where I can put my pentesting skills to the test to empower the team.

language:

Spanish – native
English - Basic

Knowledge:

- ✓ **Network protocols:** handling of routing protocols in networks such as OSPF, RIP and switch configuration in cisco OS.
- ✓ **Pentesting and analysis tools:** Experience with tools such as arp-scan, netdiscover, aircrack-ng, ipfire, Metasploit, Nmap, Wireshark, wpscan, Jhon the Reaper, Hydra among others.
- ✓ **Information security models and regulations:** knowledge of best practices according to ISO 27001.
- ✓ **Auditor in WIFI networks:** Handling of aircrack suite with airodump, aireplay and wireshark for security testing in WIFI networks.

Hard Skills:

- ✓ **Pentesting:** Execution of penetration tests in controlled environments.
- ✓ **Network management:** Network administration on Cisco systems.
- ✓ **Vulnerability analysis:** Use of tools to identify security risks in systems such as nmap and nessus.
- ✓ **Exploitation of vulnerabilities:** ability to identify and exploit vulnerabilities in services and systems.
- ✓ **Security standards:** basics in information security management systems (SGSI) ISO 27001.

Soft skills

- ✓ Adaptability.
- ✓ Complex problem solving.
- ✓ Critical thinking.
- ✓ Teamwork.
- ✓ Effective communication.
- ✓ Time management.
